SWISS-TRAC Wheelchair towing machine

Dear SWISS-TRAC user,

we can confirm you the following:

- Our towing machine model SWISS-TRAC SWT-1 is fitted with airworthy, **non-leaking batteries (dry batteries, non-spillable). The batteries comply with all current safety standards.**
- That these batteries contain no liquid acid and that during air transport no safety measures regarding leakage are required.
- The wheelchair towing machine is an aid that belongs to your wheelchair. It weighs approx. 65 kg and measures roughly 80x50x58 cm (LxWxH).
- All main airlines transport the wheelchair towing machine **free of charge as it belongs to your manual wheelchair**. Wheelchairs of disabled people are generally transported free of charge.
- If your airline applies an additional charge, we advise you to make your reservation with another large airline company instead.

We advise you to inform your airline that this traction machine must **n e v e r be transported on the luggage conveyor belt.**

Advise:

Put a note on the side or on the armature board with the words **"DO NOT PUT ON BELT"**.

We wish you a pleasant journey and remain,

Yours Sincerely,

ATEC Engineering Ltd.
